

Job: Marine/Intertidal Fauna Specialist (Contract/Full-time)

Job Duties And Responsibilities

Camphora is a collective that provides integrated flora, fauna and arboriculture baseline data to inform design intent and formulate solutions for ecological conservation.

We are seeking to hire an enthusiastic and self-motivated individual who has a passion for biodiversity and enjoys working in the outdoors.

You will mainly be assisting in the following (but not limited to):

- Planning and execution of marine surveys, such as intertidal quadrat sampling, subtidal coral, fish, and invertebrate surveys, and coral transplantation
- Processing of survey data, including species identification, data entry, management, and analysis
- Report writing, including integration of baseline information into biodiversity impact assessments and development of recommendations
- Conduct inspections at development sites
- Manage project deliverables
- Attend and prepare for meetings

Job Requirements

1. Diploma/Degree in Environmental Science or related fields, with a background in marine ecology
2. At least 2 years of working experience in a related field
3. Passionate about biodiversity conservation
4. Responsible, independent, and possess strong interpersonal skills
5. Physically fit, with diving experience, and comfortable being outdoors and in the forest and marine environments
6. Able to work in a fast-paced environment and meet project deadlines
7. Training will be provided but familiarity with species identification of marine/intertidal fauna will be an advantage
8. Knowledge in GIS and/or data analytics will also be an advantage

Appointment may be full-time or on a 1-year contract basis. Salary will be commensurate with qualification and experience.

To apply, please send a cover letter and CV to Derek Yap at derek@camphora.com.sg.
